
Free text questions stopped working

Posted by jlb4350 - 2011/10/04 13:58

Hi, i've been using ariquiz for some time now and it has always worked great. I have a few quizzes that have 10 single questions and 10 free text questions. These quizzes used to work great, but i recently upgraded to version 2.10.0 and now my free text questions do not save. The user can enter an answer and click save, and then it shows "loading...please wait" and never goes to the next question.

Another issue is that when i change a question in the bank, i have to remove it from all the quizzes and re-import it to get it to update in the quiz...it does not update in real-time.

I'm running Joomla 1.5 and PHP 5.2.17. Please let me know what i need to do to fix it and get my quizzes working again.

Thank you.

Hello,

Could you provide a link to a quiz where we can see the problem and temporary access to your J! backend by email so we could investigate the issue?

Regards,
ARI Soft
