
Can Registered Users Create Test/Quiz from fronten

Posted by desis - 2009/07/10 07:38

I like to buy Ariquiz but I like to know Can Registered Users Create Test/Quiz from frontend?

as I have read in the description allows to create tests using access rights for users

but in the demo site I could not find any way to create tests. So please make it little bit clear.

Hello,

Currently ARI Quiz supports ability for creating quiz on the component backend only. "allows to create tests using access rights for users" means that you can set user groups on quiz settings page which will have permissions for passing quiz.

Regards,
ARI Soft
