
How to update correctly?

Posted by lecommand - 2009/07/14 06:35

Hi Guys,

I installed AriQiz a long time ago and want to update to the newest version right now. How can I do that without losing my questions? Is there a manual somewhere?

It would be great if someone can help me...

Many thanks and best regards
Bastian

Hello,

Only uninstall old version of ARI Quiz and install new version through standard Joomla! install/uninstall page. All data will remain untouched.

Regards,
ARI Soft

Hello,

thanks for this fast reply. That is quiet easy! :)

Thank you!

best regards
Bastian
