## Quiz results list name / username display problem

Posted by xoundboy - 2009/07/14 13:49

---

Hi

I have a problem with the quiz results table: when two or more people are registered in Joomla with the same name (not username) , it is impossible to distinguish between them in the results list. This would be possible if the quiz results table showed username as well. This is becoming a real problem as more and more people register. Please could someone tell me how to display the results properly.

thanks

Hello,

ARI Quiz shows username and login in results table on the component backend since version 2.4.0. You can read about it here. You can download the latest version of the component in 'Member Area' on our site.

Regards,  
ARI Soft
