## V. 2.10.0 on Joomla 1.7

Posted by Sloth - 2011/10/20 08:42

---

Good afternoon!

1. For transition to new version ARI v. 2.10.0 I should put Joomla 1.7 and then anew to buy from you standard package ARI Quiz which is combined with Joomla 1.7? I.e. if at me already is license for ARI Quiz for Joomla 1.5, I should pay anew 75\$?

2. Tests which I have made on Joomla 1.5 at installation 2.10.0 will be kept in base or they should be kept and then to import anew in the new version?

3. Plug-ins from 1.5 approach to ARI v. 2.10.0?

Thanks!

Hello,

1. All extension's updated and support are available during a year after purchase. After this period you can prolong subscription, it costs half price of the extension.

2. It is possible to use data from previous version of the extension.

3. "ARI Quiz in Content" and "ARI Quiz Learning Path" plugins were updated and they are compatible with J! 1.7.

Regards,  
ARI Soft
