ARI Qiuz Category Layout-categories don\'t show up

Posted by ivan.t.ivanov - 2011/10/24 09:45

_____

We created some categories. In every category we have a few tests. Then we create a menu items type Qiuz Category Layout. We expect that every menu item will show the tests in the selected category from Required Settings. When we select the first menu item - the tests in the first category show up, but unfortunately when we choose another menu item it displays only the tests in the first category.
We are using ARI Quiz 2.10.0
Joomla 1.7.x
That is the problem, we axpect some solution from you.
Thanks in advance.

_____

Hello,

Could you provide a link to a page where we can see the problem and temporary access to your J! backend by email so we could investigate the issue?

Regards,
ARI Soft
