Jomsocial plugins not working- how to troubleshoot
Posted by bijuhameed - 2011/10/24 11:49

_____

Hello,

I am using ariquiz with joomla 1.7 and jomsocial 2.2.. I am unable to get the jomsocial plugins to work, both activity and profile displays. Would you kindly help me with this

Thanks
Bijou

_____

Hello,

Could you specify what exactly doesn't work? Do you see nothing? See "Data error" message?

Regards,
ARI Soft

_____

Thanks for the superquick reply.
Nothing seems to happen on the jomsocial side. I tried putting the plugin first on the list etc. There is nothing on the error log either. I had downloaded the plugins from the link in the FAQ. Maybe I am using an outdated plugin
