
Same quiz in different languages

Posted by cichavi - 2011/10/26 09:44

Hello,

I'm testing Ari Quiz Lite and I would like to create the same quiz but in different languages. I understand that I can translate Ari Quiz and set the default language, but that will be for all created quizzes. Is it possible to set language per quiz?

Thanks in advance...

Marko

Hello,

"ARI Quiz Lite" doesn't support described ability, but "ARI Quiz" provides ability to set specific language for specific quiz with help "ARI Quiz Language Switcher" plugin.

Regards,
ARI Soft
