## Quiz wont show after upgrade...

Posted by talkmanagr - 2009/08/03 19:07

---

We had working quizzes in our previous dev version of our site. We've upgraded our site to dev2, upgrading Joomla and ARI quiz to the latest versions. Now our previous quiz is no longer visible.

Another curious issue is that a category cannot be added to a quiz (javascript dis allows). I don't know if this helps debug.

Thanks in advance!

Hello,

Could you provide access to your Joomla! backend by email (info@ari-soft.com) that we investigate this issue?

Regards,  
ARI soft
