
quiz category layout

Posted by Pii - 2011/11/25 14:15

Hi, one question: i want quiz in the quiz category layout to be shown different way. Can i someway change template? i want every quiz to have small image and all quiz to lay in 4 columns instead of list. can i someway do like this?

and one more question, can one category include othere? or have sub-categories? thank you for answer

Hello,

Quiz category template file is located by \components\com_arquiz\view\cat_quiz_list.html.php path. You can modify it for your needs.

About categories, currently the extension doesn't support ability to create sub-categories.

Regards,
ARI Soft
