## mod\_arquiztopresult

Posted by ancape64 - 2009/08/12 16:16

---

Is there a way to display in the module "mod\_arquiztopresult" the notes in order to better last replaced the earlier of equal value?

Today is showing name of the first user who had the best note. I would like displaying in this module the name of the last user who had the best note. It's possible?

Sorry, but now it's impossible, module show the first person who earned the best score. You can submit feature request here and we'll implement this feature in one of the next releases.
