
Import Questions and Quizzes

Posted by rodrigpc - 2009/08/14 02:18

Hello!

I Know that the new versions has an import feature, but I don't know how to use it. Can you post a how-to, please?

Tks.

Hello,

New versions of ARI Quiz contains new sections 'Export' and 'Import' on the component backend. You can import 'ARI Quiz' data from one instance of Joomla! system to another. For this you open 'Export' section on source instance, select needed quizzes and bank questions, click 'Export' button and save data file, then you open 'Import' section on destination instance, select data file and click 'Import' button. That's all.

Regards,
ARI Soft
