Want to change question score from back end
Posted by softwareqatestings - 2009/08/15 16:50

_____

Hi,
I have created a good number of quiz but forgot to put score 1 against each question. Now it will be difficult to do that from front end as a big number of question is uploaded. So can you please tell me how I can do that from backend database query using MySQL.

Thanks
Raj

_____

Hello,

You can use the following query:

```
UPDATE
    jos_ariquizquestionversion QV,
    jos_ariquizquestion Q
SET
    QV.Score = 1
WHERE
    QV.QuestionVersionId = Q.QuestionVersionId
```

PS: We'll add mass property edit in the next version of the component.

Regards,
ARI Soft
