
Multiple problems after upgrade

Posted by softwareqatestings - 2009/09/17 17:43

Hi,
I am having multiple problem after upgrading the quiz to the latest version:

1. Some of the quiz is not opening at all. If I click on the quiz link it is giving blank page.
2. The Quiz result is not getting saved at all even after I complete the whole quiz.

Please help asap as this is a hot feature in my site.

Thanks
Raj

I have sent you the back end admin access to info@ari-soft.com

Thanks
Raj

Hello,

Try now, please. 'BIG SELECT' MySQL option was disabled. We have installed 'ARI DB Tweaks' plugin which enables this option and now all should work fine.

Regards,
ARI Soft
