
Quiz result list

Posted by dolomite - 2009/09/21 14:01

On the 'Quiz result list' screen is it possible to hide the 'Passed' column from view? Our client has requested that it be removed.

Thanks very much.

Hello,

See screenshot, please. Do you mean the line marked in red arrow?

No, sorry to be confusing but please see the attached screenshot.

It is the column shaded green. The client wants this completely removed.

Sorry for misunderstanding. You can hide this column if define the following CSS rule:

```
#dtUserQuizStat .yui-dt-col-Passed
{
    display: none !important;
}
```

You can place this CSS class to your template CSS file.

Regards,
ARI Soft
