
adding multiple questions from bank

Posted by CaminoDeFlores - 2009/10/15 03:28

Hi,
Im create a bank category, then add new questions to question bank to that category. How i can add all questions from that category to quiz? (about 100 questions)

on forum I was find that 2.4.0 version has it functionality but in my 2.7.0 I cant found it

p.s sry for bad english

Hello,

ARI Quiz supports this possibility since version 2.4.0. For using this ability open 'Quizzes' page, click 'View' link in 'Questions' column for necessary quiz. On questions page click 'From Bank' button, datagrid with bank questions appears, select necessary questions and click 'Import' button. That's all.

PS: You can find screenshots in attach.

ty, its work
but I dont see titles near some buttons, thats why I was cant found it function.

Lang: russian
Browser: IE 8.0 and Firefox 3.5 <http://www.ari-soft.com/images/fbfiles/images/Untitled.jpg>

and another problem now... i cant delete questions from bank, i check questions, click delete and "Question deleted" but in real nothing deleted, all categories, quizzes deleted. Nvm, I just reinstall ARI Quiz

Download the latest version of the component in 'Member Area', please. It contains fix for issue with deleting bank questions and updated Russian language file.

PS: Be aware you can't delete questions from bank which use in quizzes.

Regards,
ARI Soft
