Details in email

_____

Hi. I see there are many parameters to add into the email templates (such as {$UserName} and {$QuizName});however, is there a way I can include a details parameter in the templates so that the details of the quiz is included? Same for the Print button when a user completes a quiz. They can review the details of the questions, but there is no parameter to add into the print or email templates so that they can also print or email the details to themselves. This is really a needed function of the software. Is there any way to work around this currently to include this parameter?

Thanks for your help.

Re:Details in email

_____

Hello,

Unfortunately the component doesn't support this ability, but we'll add this feature in one of the future releases.

Regards,
ARI Soft
