
Freertext issues

Posted by asphalto - 2009/11/10 09:24

I need to enlarge the answer field of the "freertext question". Where I can change some parameter?

Is it possible to evaluate a long answer by matching the words just with a percentual parameter or something like that?
I'd need it for a traslation quest, and I'm thinking how to solve this issue.

Hello,

Regarding your questions:

1) Open /administrator/components/com_ariquiz/templates/questions/freertextquestion.html.php file, find '
