I don\'t want my competitors to see results

Posted by eMCe71 - 2009/11/16 15:56

_____

Hi there!

first of all I want to say that you had great idea to making such a quiz programme for Joomla and the best thing is Hotspot type where you have to show for example where is a fish;) I am just about to but ari quiz but first I need to know answers for some questions because for me 75$ it's not so cheap.

1) I want to make some competitions on my website so I don't want my users to see the results after they finish each quiz (don't want them to tell other users what should be in questions). I will manually send them emails after the end of whole chalange.

2) Do I need any 'strong' hosting? I have (host main page nazwa.pl) 10GB FTP, php 5 and mySQL 5, 2000GB transfer per year and about 500 users a day.

3) is it fully compatibile with CommunityBuilder?

Thanks for your time!
eMCe71

_____

Hello,

Thanks for your interest in ARI Quiz. Regarding your questions:

1) Yes, you can hide results and show any text on quiz finish page. Use 'Show Statistics' option in quiz settings for hiding results and 'Text Templates' section on the component backend for set text on final page.

2) This should be enough.

3) What do you mean under 'fully compatibile with CommunityBuilder'? Which feature you need? Community Builder plugin for showing user results is available and you can download it on ARI Quiz page.

Regards,
ARI Soft

admin wrote: Yes, you can hide results and show any text on quiz finish page. Use 'Show Statistics' option in quiz settings for hiding results and 'Text Templates' section on the component backend for set text on final page.

You mean I should create some text template and than set it when creating new quiz? I can't find Show Statistic (i see show full statistic - is it the same?) and quiz setting.

Ive just made it (on your demo site and backend) as I wrote above and results are still visible.

Thanks!

_____

Ok I unchecked "show full statistic" and I see text which I provided in new text template. Thx!

Hi there,

I have just bought ARI Quiz and downloaded it but can't install it on Joomla 1.5

I see:
Component installation failed

Couldn't execute query. Error: You have an error in your SQL syntax; check the manual that corresponds to your MySQL
server version for the right syntax to use near '`Status` `Status` SET ("Prepare", "Process", "Finished", "Pause") NOT
NULL DEFAU' at line 1 SQL=ALTER TABLE jos_ariquizstatisticsinfoCHANGE `Status` `Status` SET ("Prepare",
"Process", "Finished", "Pause") NOT NULL DEFAULT "Process".

I am reading Help right now and I can see that I should unzip file and see:

com_ariquiz.1.0.zip - installation file for Joomla! 1.0.x
com_ariquiz.1.5.zip - installation file for Joomla! 1.5
readme.txt - file containing installation instructions

I get file com_ariquiz.zip which I extracted and I see folder com_ariquiz and than if I clicked it I see all of folders. I tried to instal com_ariquiz.zip but I had this debug which I wrote above.

Please help me!

_____

Sorry for inconvenience, we'll try to reproduce this bug and fix it. Could you say, have you installed ARI Quiz Lite before installing ARI Quiz?

Regards,
ARI Soft

_____

It's the cause of problem, but we have fixed it and now ARI Quiz supports upgrading from ARI Quiz Lite without errors.

PS: If you want, you can download fixed version of ARI Quiz in 'Member Area' on our site.

Regards,
ARI Soft
