Hello,

Are there any future plans to create a ARI Quiz Results plugin for Jomsocial?

Hi AriSoft

Just wanted to check up on the jomsocial plugin.

This would be an awesome feature for the jomsocial system, if the users via a application plugin, could keep track of there taken quizzes and scores

Also if the plugin could via the jomsocial activity stream ,could announce when a user has take a quiz. Maybe something like:

Bryan has just taken the quiz about american history and got the score 85%.

Best regards
