Logo jpg image in \"mail template\"

Posted by dashbaugh6025 - 2010/01/22 04:49

_____

Can someone please explain how to insert image (logo) into the mail template for quiz results? I have tried traditional media manager approach but the results end up with "logo image" text where the logo image should be.

Thanks for the assistance.

_____

Hello,

Place full url for HTML tag. In other words, if your logo is located by the following path: /images/logo.jpg then place in mail template the following code for showing logo:

Where is your domain name.

Regards,
ARI Soft

_____

Hi

In regards to the logo placement
on the email template. I am able top
to place the gif image of the logo
on the editor and can view it.
However, logo image does not show
up on sent email. When email is
received there is no image.
How can I sent mail template with
image logo?
Thanks,

_____

Hello,

Switch your WYSIWYG editor to "HTML" mode or plain text mode and check that image contains full path (starts with http://). If you have any difficulties with it, you can provide temporary access to your Joomla! backend by email and we'll help you.

Regards,
ARI Soft

_____

Hello,

I appreciate your response
regarding the email template
issue. I have attempted it to
configure it several times to
no avail.

I have sent you log on
credentials so you can show me
how to configure.

Thank you for your assistance.
