
Presales question: Open surce ?

Posted by Mrrmr - 2008/06/11 16:15

Hi I'm looking for a quiz open surce php code for integration into my joomla website. I have to pass few variables together with the \$user_id, it's why I need to make some changes. The question is if this is open surce. Can I change the code inside?

Thanks in advance for your kindly answer

Hello,

ARI Quiz is not an open source component. If you would like some additional changes we will be happy to make custom development for you: <http://ari-soft.com/Custom-Development/Support/Work-Unit/Detailed-product-flyer.html>

Regards,
ARI Soft

Too bad. I'm going for your compation then. Have to pay 3x higher price but itÒ's open source.

Good Luck with your development!

How much access to the data is available for creating your own interface for authoring quizzes since it is encrypted?

Templates are not encrypted, they just contain obfuscated php code. So if you wish you can change HTML code to create your own templates.
