
Mathematical actions over UserScore

Posted by Federico - 2010/02/21 22:51

Hi!

I wish to make before result display mathematical actions over UserScore. Is it possible?

P.S. For example, H.J.Eysenck IQ tests $\$UserScore = (\$UserScore-6)*2.8+90$

Regards.

Hello,

The component doesn't support this ability, but you submit feature request here and we'll implement it in a future release.

Regards,
ARI Soft
