Test are not restarted at begin...
Posted by Federico - 2010/02/23 11:40

_____

Hi!

Test are not restarted at begin, and proceed from a stop place if you come into them again.

The option "Can stop" is not enabled. The user is the anonymous visitor.

That the interrupted test has begun with the beginning, it is necessary to come into other test.

What I not correctly do?

Best regards.

_____

Hello,

The component stores the last point of a quiz session. You can clean cookie, if want to reset the previous quiz session.

Regards,
ARI Soft

Hello!

>You can clean cookie, if want to reset the previous quiz session.

But it is not so convenient for unadvanced users.

Regards.

_____

Hello,

This action doesn't require from user. The system starts a quiz from the previous point because user can leave a quiz by mistake or user browser's can be crashed. We are going to add new parameter 'Quiz Session Timeout' in a future release of the component, which will be used for reset the previous quiz session.

Regards,
ARI Soft
