
Links to quizzes don't work anymore

Posted by bmeyer - 2012/10/31 18:11

Hello,
I have just updated my Joomla to 2.5.7 and AriQuiz to 3.3.0. Now the links to the different quizzes don't work right anymore. To be seen at <http://www.englishexpertise.de/de/zumtest>
Every "zum test" - Button leads to quiz a1 (ID 1) and in the source code of the page every button has the ahref "/de/zumtest/a1?task=quiz". But I have defined the link like "index.php?option=com_ariquiz&view=quiz&quizId=3&task=quiz&Itemid=587", giving every button a different Id. That worked fine until now. Where could that changing of my link have taken place?

I found the solution: I had to disable SEF

Hello,

We can investigate the problem if you provide a temporary access to your J! backend by email.

Regards,
ARI Soft
