Problems with .htaccess for Joomla-backend

Posted by dif - 2010/03/09 19:14

_____

Hello Ari-Soft,
My backend is secured via .htaccess. I usually am logged in at the backend during testing, so i did not realize the problem at first: When i am not logged in in the backend of J1.5, ari-quiz does not work - it wants me to enter the .htaccess user and password. For the quiz-users obviously this is not an option. This did not happen with ari-quiz-lite. Is there a workaround for this?

Thanks in advance! I am looking forward to use the component ...

greetings

dif

Hello,

Could you say link where we can see this issue? You can send it by email.

Regards,
ARI Soft

_____

We have updated the component. You can download new version in 'Member Area'. Re-install the component, please, for resolving the issue.

Regards,
ARI Soft
