In your previous post you wrote that "Component not found" message is shown when select a quiz from drop-down menu. This problem was fixed.

Do you mean another problem now?

Its the same problem. Has been there all along. There is a "knowledge assessments" tab that appears below the topmenu

only one menu= knowledge assessments. It appears in the over the slid show images...it is white font so unless background image is darker it is easy to miss.

Thanks

It is not "ARI Quiz" issue. You see two "Knowledge Assessments" menu items because "Top menu" menu on your site contains two menu items with name "Knowledge Assessments". Use Joomla! menu manager to edit menu items.
