Import CSV for With Penalty point
Posted by rkkadian - 2012/11/16 15:04
_____

Dear Team,

1) Plz guide me how can we upload questions in CSV format including penalty point because there is no sample CSV format including penalty point in documents in your website.

2) Can we do mass edit for penalty points as like Mass edit for Score .

3) How can i hide help menu or your links from help menu from Admin because help menu is showing your links.

4) How can i hide com_ariquiz from admin url address bar.

_____

Hello,

1. Upgrade the component to v. 3.3.6 and add "Penalty" column to a CSV file. We have sent a sample CSV file by email.

2. You can submit feature request here and we will implement it in a future release or if you need this feature urgently we can implement it as custom development.

3. "Help" button is added in view.html.php files in sub-folders from \administrator\components\com_ariquiz\views\ folder.

4. It is not possible. Joomla! uses "option" request parameter to identify what component should be loaded.

Regards,
ARI Soft

Dear Team,

4. Reply-Why you can not use com_onlinetest instead of com_ariquiz it will look better & favorite for web developers and also it will increase your sales also.

3. "Help" button is added in view.html.php files in sub-folders from \administrator\components\com_ariquiz\views\ folder.

Reply : guide me which part i delete or add (i am non-coder) to hide the help menu from ariquiz toolbar or how can i change your link to my link .

_____

3. Delete the following code:

AriQuizToolbarHelper::ariQuizHelp('ARIQuizComponentReference1.html');

4. We use "com_ariquiz" because extension called "ARI Quiz" and it is not possible to sell it as your own extension.

Regards,
ARI Soft

1. Reply : Penalty point is showing in quiz question after upload but it is working because it is not deducting the point for wrong answer.

Note : if we are typing the question then penalty is working for new Quiz .

Dear Team,

I upgraded to Latest Varsion and penalty point are showing in question after upload through CSV file but it is not working because it is not deducting the penalty point for wrong answer.

Note : Penalty point are working if question & quiz created manually with CSV import.

We can't reproduce described problem. When we imported questions from CSV file with penalty points to a quiz, penalty points deducted fine.

Could you provide a link to a quiz where we can see the problem and a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft
