## Different scoring for multiple choice questions

Posted by blaztoma - 2008/10/08 20:45

---

Hello,

The component works very nice and we are really happy to use it, but we have one serious issue. We can't appoint different scoring for multiple choice question (sorry if i missed it, but i could not find it). For example, even if people check corectly 5 from 6 correct answers they still get 0 points. People complaint that this is unfair and it really is. The only way is to downgrade the complexity of multiple choice questions, but then multiple coice questions have a little sense as they are becoming similar to single choice questions.

It would be ideal if we could apply such scoring formulas for multiple choice questions:

- \* everything or nothing (as it is now);
- \* percentage of correct answers;
- \* percentage of correct answers - incorrectly checked answers > 0

Regards,  
Tomas

Hello,

There is no such functionality right now. We are planning to add Advanced Score Manager functionality that includes the feature you describe.

Next version of ARI Quiz component will include Result Scale functionality and possibly new type of question. After that we will be working to add Advanced Score Manager.

Regards,  
ARI Soft

Hello,

Now that you have completed Result Scale functionality, could you, please, share information on when we could expect Advanced Score Management? (sorry to ask, but it is important for us :))

Hello,

We're currently busy on our products so most probably Advanced Score Management functionality will be available in December.

Hello,

ARI Quiz 2.2.0 has been released.

New version contains several new features and enhancements:

- \* Single, Multiple and FreeText question can have different scores for different answers
- \* Single question may display possible choices as radio buttons or as drop-down
- \* Single, Multiple, Correlation and Drag'n'Drop Correlation questions have Randomized order setting that allows displaying possible choices in random order
- \* Last results and Top results modules have 2 new options: ignore anonymous users or not, display login or user name
- \* UI enhancements for Drag'n'Drop Correlation question
- \* Bugs fixed
- \* Performance improvements
- \* German and Russian translations updated

ARI Quiz 2.2.0 may be downloaded in member area.

Regards,  
ARI Soft
