_____

Hi,
I am trying to import some question and it is giving me the error "Import data failed". Attaching the CVS.

I have also create one category called category 1 in bank categories.

Please let me know whats wrong.

Attaching the csv I am trying to import.

Thanks

Hello,

Find corrected file in attach. You file contains strange data at the end of file. You can see it if open your CSV file in text editor.
