
Congratulations, NOT passed

Posted by larryp - 2010/04/02 00:25

If someone takes a quiz and fails, the message on the results page says "Congratulations (username)! You have not passedâ€!"

How can I change this so that if the user fails the test, a different message to the "Congratulationsâ€!" comes up?

Hello,

Open "Text templates" section on the component backend, create template for failed quiz, open quiz settings and choose this template in "Text templates -> Failed template" drop-down and save quiz settings. That's all.

Regards,
ARI Soft
