
Image with question choices

Posted by pdfpublisher - 2010/05/03 12:49

In the ARI Demo Quiz question 5 and 9 have images along side the choices. Could someone provide an example or instructions on how to do this?

Thanks

Hello,

You can enter HTML code into answers. For example, if you want to show image which is located by the following path "images/test/my_image.jpg", place the following code into an answer:

How do you change the image directory from images to images/quiz/ford.png. I can display question images by a direct link to the root images folder and it displays OK but will not display when I can it to images/quiz/ford.png. I have cleaned the cache when I ran my test.
Thanks for your prompt reply.

Hello,

Could you provide link where we can see this issue?

Regards,
ARI Soft

To anyone experiencing the problem mentioned in this post:
It's important to clear the cache when ever making changes in the back end.
My images are being displayed properly from my root image directory: images/quiz/ford.png

Hope this will help others and let ARI Quiz support team know how greatly we appreciate their prompt tech support.
