
Time of loading of a question

Posted by Federico - 2010/05/09 11:15

Hi!

I very much love your component! I with pleasure use it! But I not so like time of loading of a question. It can be accelerated in following versions?

Hello,

On our demo site questions are loaded fast or not? 'Parse plugin tag' option is enabled in quiz settings on your site or not? Could you provide link where we can see problem with questions loading?

Regards,
ARI Soft

Hi!

O your demo site questions are loaded not fast. I think, that this time of loading satisfies many users. But I met on other sites (using other software) time of loading of questions almost instant.

Hello,

Could you provide links where we can see other quizzes systems what you mean? Do they use AJAX for loading questions? We suppose they load all questions on page and hide or show necessary part of questions, in this case a user with minimal technical knowledge can see all questions without problem when the first question will be loaded.

Regards,
ARI Soft
