About ARi quiz plugin for sh404 SEF

Posted by Bambino - 2010/05/12 12:23

_____

Hi Ari team,

When I install the Ari quiz sh404sef plugin, I have urls lokking like this :

www.domainname.com/ARI-Quiz/name-of-quiz-2-33.html

Would it be possible to have instead :

www.domainname.com/choosen-keyword/name-of-quiz-2-33.html ?

From an SEO perspective, this would be much better, especially because we would be able to insert things like :

www.domainname.com/free-quiz-about-keyword/name-of-quiz-2-33.html or any other appropriate keyword.

_____

Hello,

You can change 'ARI-Quiz' keyword to necessary keyword in /components/com_sh404sef/sef_ext/ariquiz_helpers.php file. See line #17, please.

Regards,
ARI Soft

_____

Thanks for the quick answer ! However, that's strange because I changed this to the keyword I was looking for, but it still displays ARI-quiz in the URL ! I changed it 2 hours ago and it's still the same. Are the urls stored in some cache or something ?

_____

sh404SEF component stores cache of URLs. Purge cache and it should help.

_____

The solution here worked perfectly, except for one thing :

The web page where I display my quizzes has an url like :
www.domainname.com/alias-of-the-menu/keyword-chosen (my problem is that my alias of the menu is the same as keyword chosen, so I have www.domainname.com/alias-of-menu/keyword-chosen where alias-of-the-menu = keywords-chosen

Do you have any idea on how to have an url with the kw one time ?

Thanks

_____

Hello,

You can try to do the following:

Open \components\com_sh404sef\sef_ext\ariquiz_helpers.php file on your server, find line #157 and comment the following code:

$this->title = !empty($title) && $title != '/'
  ? $title
  : $this->_getMessage('SEF_QUIZ_LIST');

After this purge SEF URLs.

Regards,
ARI Soft

Guys, you're really good. It works !

Except for that fact that I don't have .html at the end of the url. Do you think it's possible to have it (this page is in the search engines with the .html at the end so it would help)

Thanks for your help, it's really useful.

Excellent, it worked. I just had to re-change the keyword on line 17 of ariquiz_helper.php file to match what I wanted, but it works perfectly so thanks a lot !
