Result Summary at end of quiz

Posted by arathra - 2010/05/21 13:02

_____

I may be missing something obvious here, but when the quiz ends I can see all the questions with the answers, but I'd also like to see a simple summary block saying something along the lines of

"You've passed the quiz with XX% - congratulations"

And if that text was editable that would very useful. Does this exist already or does in need to be coded into the quiz events plugin?

Thanks.

_____

Hello,

You can edit text of quiz results page and use some predefined variables such user name, score and other on it. Use 'Text Template' for this. Create necessary text template(s), open a quiz settings page and choose necessary text templates in 'Text templates -> Successful Template' and 'Text templates -> Failed Template' drop-downs.

Regards,
ARI Soft
