Currently we are using ARI Quiz Lite. We are probably going to upgrade within a week or two as we are getting where we need the more advanced features.

My question is this: Can the full version allow a group of people to view quiz results? I want to give this as advanced feature for registered users who have membership.

The other question I have is will I lose my current quizzes if I upgrade to the full version?

Thanks
Thomas

Hello,

Do you want to grant permissions for users from selected user group(s) to see all quizzes results (for other users) on frontend?

After upgrade from "ARI Quiz Lite" to "ARI Quiz", all quizzes will be available in "ARI Quiz". You can read about it here.

Regards,
ARI Soft

Maybe is that what I need, but I don't know if I understand it well.
I'll give a example:

1. I access the quiz as a guest - not be able to show the results
2. I access the quiz as a registered user in a specific group - able to see his quiz results

Is that what you mean?

So it's possible to implement this for me, then I can buy the version pro?

I didn't want to start a new thread about this topic since they are asking the same question i have, I have the full version of ari quiz not the lite, I would like each registered user to see only their quiz results, I have 12 quizzes and after they hit "save" they can no longer see their quiz, so really what i need from ari quiz is the ability for each registered user to see the results of each of their quizzes and no one else's please advise

Hello,

Set "Results settings -> Show detailed results" parameter to "Always" in quiz settings.

thank you, it does work while a registered use is logged in and navigating around the cours, but if they log out, like at the end of a class and then log back in the next day to continue the course it's not available

If you want to create with all user's results, create a menu item with type "ARI Quiz -> Quizzes results" in Joomla! menu manager.

not really wanting "all" users to see all the quiz results, just looking for a way for an individual to only have access to their quiz results, or if a user can export their results to themselves.

Re:Viewing results

Posted by admin - 2014/04/22 17:01

User will see only own results.

ok, again thank you, creating the menu for individual results seems like it will work for our needs, 1 last item, how can a user print these results?

You can create a text template in "Text templates" section on component backend and select it on "Results settings" tab in quiz settings. One note, it will not contain details results (questions with answers).
