## stop skipping questions

Posted by arathra - 2010/06/07 11:09

---

We had an issue today with a quiz. I have set it so that CAN SKIP and CAN STOP are both unticked.

However, if someone takes a question and does not answer it there is the option they can move on without answering it; a box pops up asking them if they want to move on.

I know they won't get a score for it, but I'd like to have it so a user MUST answer a question before they can move on.

Is there somewhere to set this option?

Hello,

'Can skip' option is used that specify show or not skip button during a quiz. 'Can stop' option is used that specify can a user click 'Stop' button during a quiz and return to it later or not. We have created update that change the component behaviour. Check your mail, please.

PS: We'll add new option that change this behaviour in a future release.

Regards,  
ARI Soft

Thanks!

That's great - and good service from you guys, too!
