White page by using the menu item \"all quizzes\"
Posted by niesomaticus - 2014/03/27 12:33
_____

Hello,

I'm using Joomla 3.2.3 and have a problem with the menu item "All Quizzes", wich will show all quizzes. In my case I've published one quiz and all works fine, it is shown in the right category. Then I copied this quiz. Consequently, it has the same settings and is located in the same category.
If I klick now on the menu item "all quizzes" I only get a completely white page in joomla. :blush:
It is the same if I publish an new quiz (without copying). As soon as I publish more than one quiz, I get a white page. :(

I'didnt change anything in the menu! If I unpublish one of the quizzess and does not matter which, all works fine :blink:

All the other menu items working perfect, even if more than two quizzes are published.

Info: I have installed the latest version (3.6.6) again, but that has nothing helped.

best regards
niesomaticus

_____

Hello,

Set temporary "System -> Global Configuration -> Server -> Error Reporting" parameter to "Development" value on Joomla! backend and open quizzes page again. It should contain an error, send it to us so we can investigate the problem.

Regards,
ARI Soft

I receive the following

Fatal error: Cannot use object of type stdClass as array in plugins/system/aricolorboxanywhere/aricolorboxanywhere/kernel/Utils/class.Utils.php on line 28
