## Change time and date format

Posted by niesomaticus - 2014/03/31 16:50

---

Hello,

can you tell me in which file I can change the date and time format wich is shown on the result page? :huh:

Regards  
niesomaticus

Hello,

Do you want to change format for {StartDate} and {EndDate} predefined variables?

Regards,  
ARI Soft

---

It is possible to apply "date\_format" formatter for variables. It uses parameters like for date() PHP function. For example:

{StartDate|date\_format:d-m-Y}

---

{StartDate} and {EndDate} are predefined variables which can be used in text and mail templates. See "Text template" and "Mail templates" sections on component backend.
