Where to change css?

_____

Hello guys,
I'm having problems with the way quizzes show on my site with the templates I have. I would appreciate your help on this.
I attach a pic for you to see what I try to say.
Thanks in advanced,
R http://www.ari-soft.com/images/fbfiles/images/css_chan.jpg

Re:Where to change css?

_____

Hello,

Send a link to a page where we can see the problem.

Regards,
ARI Soft

Re:Where to change css?

_____

Just go to

http://www.languagelearningroom.com/index.php/en/accounts-with-llr

login using the following info:
user: ***
pass: ***

and then go to

http://www.languagelearningroom.com/index.php/en/my-quiz-results

==

Re:Where to change css?

_____

Add the following CSS rules to a site template CSS file and clean browser's cache:

```
DIV.ari-quiz-container,
DIV.yui-dt {
 color: #000;
}
```

For example to /templates/template_for_llr_j25_study_room/css/template.css file.

Regards,
ARI Soft

_____

I will tell you what I did, and please let me know if this solution will not create a problem in the future.

1- I created a new theme following the directions here:

http://www.ari-soft.com/docs/ariquiz/html/ARI_Quiz_UserGuide.html?Otherreferences2.html

I ended up with something like this in the loader.php file

```
(defined('_JEXEC') && defined('ARI_FRAMEWORK_LOADED')) or die;

AriKernel::import('Application.ARIQuiz.ThemeLoader');

class AriQuizThemeLoader_Light extends AriQuizThemeLoader
{
 function load()
 {
  parent::load();

  $doc = JFactory::getDocument();

  $theme = $this->getName();
  $themeUri = JURI::root(true) . '/components/com_ariquiz/themes/' . $theme . '/';

  $doc->addStyleSheet($themeUri . 'css/buttons.css?v=' . ARIQUIZ_VERSION);

  $doc->addStyleSheet(JURI::root(true) . '/components/com_ariquiz/themes/' . $theme . '/css/overrides.css');
 }
}
```

2- I copied yui.combo.css from /components/com_ariquiz/assets/css and copied it to the new theme's css file and renamed it overrides.css (as you could see above)
3- After this I stated making all the changes to adapt it to my needs.

My question is: Would this change really override what is primarily designed in from /components/com_ariquiz/assets/css, or would it overload the website with some loop code running in the background?

_____

It should not affect on styles of your site.

Regards,

ARI Soft
