
Import into Ari Quiz using MyPHPAdmin

Posted by steemer473 - 2010/06/21 03:41

I would like to import my questions from BF Quiz into Ari Quiz; Which database table are the questions stored as well as the user results as well? My hope is that I can import a csv file directly into Ari Quiz using my MyPHPAdmin

The component stores questions in the following tables:

#__ariquizquestion
#__ariquizquestionversion

and quizzes results is stored in the following tables:

#__ariquizstatistics
#__ariquizstatisticsinfo

where '#__' is table prefix, usually it's 'jos', but we suppose it's require to create converter from BF Quiz to ARI Quiz.

Regards,
ARI Soft
