
Text template: display round numbers via parameter

Posted by synkro - 2014/06/03 14:40

Hello,

Is it possible to display round numbers via the parameters of the text template? (see screenshot in attachment).

Hello,

Use "number_format" filter for variables. For example:

```
{UserScore|number_format:0}
```

Regards,
ARI Soft

Is it possible to change 'Chapter Results' to contain no decimals? http://www.ari-soft.com/images/fbfiles/images/chapter_results_no_decimal.png

Hello,

The answer in this post. Use {UserScore|number_format:0} and {MaxScore|number_format:0} instead of {UserScore} and {MaxScore} in text template.

Regards,
ARI Soft

The script removes the results if I place it in {\$SummaryByCategories|number_format:0} http://www.ari-soft.com/images/fbfiles/images/Chapter_results_decimal_not_working.png

It is not possible to use "number_format" filter for {\$SummaryByCategories} (because it contains HTML code). If you want to modify value of {\$SummaryByCategories} variable, see "ARIQUIZ_TEXTTEMPLATE_SUMMARYBYCATEGORIES_TEMPLATE" constant in \administrator\components\com_ariquiz\defines.php file. Use the following code:

```
{\$data:UserScore|number_format:0} / {\$data:MaxScore|number_format:0}
```

instead of:

```
{\$data:UserScore} / {\$data:MaxScore}
```

Regards,
ARI Soft
