Quiz Anywhere doesn\'t stay in Frontend edit
Posted by Jonte - 2014/07/08 20:24
_____

There is a problem in Quiz Anywhere working in Joomla frontend Edit command. When Article is opened in frontend, it doesn't show Quiz Anywhere link even it has been added before. In backend it works okay.

This is a real problem, because we could use article with Anywhere links for students to give their answers, not only in quiz, but in article too. So they have to edit the article and if they do that, it will delete all Anywhere links from article.

Hope this is just a little buq, and it is fixed soon.

Hello,

Download and upgrade the plugin.

Regards,
ARI Soft
