Thanks for the info, pls kindly help me view faceyourbook.net on a mobile device and take an exam logging in with
username: tunde password: tunde to see it is not mobile responsive.
thanks for your anticipated co-operation

You use not the latest version of the extension. Upgrade it to the latest version or add the following CSS rule to a site
template file and clean browser's cache:

```
BODY #ariQuizContainer .aq-quizzesession-container {min-width: 240px;}
```

You can open template.css file into a browser and see that it doesn't contain the CSS rule.

We can reproduce the problem only on quiz results/quizzes results page and it occurs due to site template styles. Add the following CSS rule to fix it:

.main-content {float:none !important;}
