
Force email on tests

Posted by ilan5555 - 2014/08/04 20:18

Dear friends,

I use a test that users can put their names and email.

How can I force them to enter their name and a valid email?

I have some students that took the test as guest without email.

Thank you,

Ilan.

Hello,

If you want to do "Name" and "Email" fields obligatory for guest users, set "Access and Security -> Anonymous access" parameter to "No" in quiz settings.

Regards,
ARI Soft

Thank you for your answer.
This is what I did and it does not help.

See pictures attached. <http://www.ari-soft.com/images/fbfiles/images/Clipboard01-581f69d637d5387a6ac5d8928f0ff27.jpg>

Could you reproduce the problem by yourself and provide step(s) how to do it?

I cannot do it by myself.

I asked my student and she told me that she was in the middle of the test, then the question could not load. Then she clicked on "refresh" and it asked to start over.

Because of that the name was changed to "guest" and it continued without an email.

I tried to do it myself but I couldn't.

Well, if it happened only once, it's no problem.

It seems internet connection of the user was interrupted and was restore with another IP address as result she was logged out.

Yes, it's strange.

Thank you.
