
Question bank

Posted by ilan5555 - 2014/08/06 17:51

Dear friends,

If I have a quiz that shows 25 questions and I have inside 30 questions, did that works as a question bank?

I tried to understand how to use the question bank and I couldn't understand it.

Is there a SIMPLE tutorial?

Thank you!

Ilan.

Hello,

Questions from question bank can be used in several quizzes (not only in one quiz).

And if I use in a quiz 30 questions and show 25, it will use the 30 as a question bank?

It doesn't make sense to place questions in question bank if you want to use them only for one quiz. In this case you can place questions directly into the quiz and use "Question count" parameter to select necessary number of questions from available quiz questions.
