
detailed result not shown

Posted by atexo - 2014/08/31 19:40

Hi,

after some changes on my side the detailed results of any quiz aren't showed at the end of a quiz. I think the "result setting" should be ok, because it was fine some days before.

Thanx Atexo <http://www.ari-soft.com/images/fbfiles/images/Bild1.png>

Hello,

Probably results don't contain wrong answers?

Regards,
ARI Soft

Hi,
no, i checked with wrong answers. Nothing is shown.
Kind regards

The page contains a lot of javascript errors which are not related to "ARI Quiz", but it can affect on "ARI Quiz" functionality. It seems an extension which removes MooTools library is used on your site, but it doesn't remove code which uses MooTools and it causes javascript errors.

Thanks for the answer. I disabled all jquery "helping" tools. The result hasn't changed. It seems that there are still some ari related errors left on the result page (see picture). The page is <http://www.iqchecker.de/starten-sie-ihren-iq-test/starten-sie-ih-fun-quiz/starten-sie-direkt-ih-fun-quiz/Results-01f897ca0b2589c15056788f09a79664.html>

Do you think this has still to with jquery errors of the website?

Thanks atexo <http://www.ari-soft.com/images/fbfiles/images/Bild1-6b6c6542a6d9b14b3f7a19b5d1d6f348.png>

Try now. It was the problem with language files which were created for German version of your site. The files were saved in non-UTF8 encoding. We re-saved them.

Issue is fixed.

I used the plugin "Mootools Enabler/Disabler" and set it at first position, it seems that this solved my problem.

Thanks for the initial hint.
Atexo

Read our previous post please. It was the problem with encoding in language files.

Regards,
ARI Soft

Runs perfectly! Thank you very much. I will keep an eye on this UTF8 topic in order to prevent future mistakes.

Thanx for this fast help!
