
License Key

Posted by bmcguire - 2008/11/24 18:01

I requested a testing License key for our domain newnet66.org.

Our website is on a testing server right now and we hit it by IP address.

Is this why the key was correct but I can not get past the license screen?

Since you hit the host by IP could you please send us IP and we will generate the license key for it. For security please reasons send IP by email.
