
Editing Quiz Css

Posted by philc - 2014/09/08 22:45

Hi, nice quiz tool, thanks,
I have a couple of problems tho, I have edited the layout to suit my site fine, all good,
but I cannot change the "save" button, it appears to be coded to here >>>

http://www.inforia.si/index.php?option=com_ariquiz&task=script.messages&t=1325819068

I want to change the name "save" to "submit", remove the pencil icon, and change the colour,
I appreciate your help ;)

Hello,

You can read here how to modify existing translation or create a new one. Label for "Save" button is located in
\\language\\en-GB\\en-GB.com_ariquiz.ini file.

\\components\\com_ariquiz\\views\\question\\tmpl\\default.php is a template file for quiz questions page.

Regards,
ARI Soft
