
anonymous access

Posted by philc - 2014/09/10 09:54

Hi,
sorry if Im missing something, I have looked before posting,
I cannot change anonymous access, it is stuck on "yes",
not sure how Ive achieved that but can you advise please ?
thanks http://www.ari-soft.com/images/fbfiles/images/quiz_access.jpg

Hello,

Do you use the latest version of the extension (3.6.14)?

Regards,
ARI Soft

Hi,
no, Im using 3.6.9 :S

Could you upgrade the extension to the latest version and try to reproduce the problem?

PS: What browser do you use?

Regards,
ARI Soft

Hi,

ok, I updated, 3.6.14, and it's the same,did I miss some settings to allow this ?

Ive used a screenrec to show you here: <http://mediamonsters.co.uk/MMLab/>

browser: I use chrome, firefox, and i.e (for different purposes of course)

thanks for looking

We can reproduce this problem only in Google Chrome browser in Joomla! 2.5. It can be fixed if add the following CSS rule to a site template file:

```
#paramsAnonymous {position:relative;z-index:20000;}
```

PS: We will add the fix to the next version of "ARI Quiz".

Regards,
ARI Soft

Thanks,
I added the line to a system.css = no change,
then to the active template css = no change,
custom.css = still no,
so into the template file itself, but could not get it working in chrome,

I had not tried it in firefox earlier, it all works ok in that,
so I will now edit in firefox,

but thanks for your great support, maybe its time to go to joomla 3 ... ;)

You can upgrade "ARI Quiz" to v. 3.6.15 and un-comment the following code in
\administrator\components\com_arquiz\assets\css\styles.css file:

```
/*#paramsAnonymous {  
  position: relative;  
  z-index: 99;  
}*/
```

it will look like:

```
#paramsAnonymous {  
  position: relative;  
  z-index: 99;  
}
```
